

Harness Eye Comparative Speed Ratings

The 2012 Harness Eye Comparative Speed Ratings have been especially designed to help the handicapper better analyze the differences in individual tracks. This list has been compiled using data acquired from different tracks. Unlike other so-called "official" speed ratings, Harness Eye's has been established after years of analysis using the minds of some of the sport's top professional handicappers. Others have attempted to develop accurate speed comparisons by strictly using final times from track to track. We believe in most cases using mathematical studies exclusively can omit some key variables necessary for rating a track's true level of speed. These speed ratings should be used in conjunction with the past performances in assessing the chances of a shipper into your local track.

Balmoral Park (1 Mile)...	BP1..	1:55.2	Monticello.....	MR...	1:58.4
